Note: The functions available on this handset may vary in different regions and nations. Please contact your local customer service centres, agencies or retailers if you have any question about the handset functions. Motorola reserves all rights to revise and change this user's manual without obligation to notify any person of such revisions or changes.

Safety and General Information

IMPORTANT INFORMATION ON SAFE AND EFFICIENT OPERATION. READ THIS INFORMATION BEFORE USING YOUR PHONE.[1]

Exposure To Radio Frequency (RF) Energy

Your phone contains a transmitter and a receiver. When it is ON, it receives and transmits RF energy. When you communicate with your phone, the system handling your call controls the power level at which your phone transmits.

Your Motorola phone is designed to comply with local regulatory requirements in your country concerning exposure of human beings to RF energy.

Operational Precautions

To assure optimal phone performance and make sure human exposure to RF energy is within the guidelines set forth in the relevant standards, always adhere to the following instructions.

External Antenna Care

If your phone has an external antenna, use only the supplied or Motorola-approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and/or may result in non-compliance with local regulatory requirements in your country.

Do NOT hold the external antenna when the phone is IN USE. Holding the external antenna affects call quality and may cause the phone to operate at a higher power level than needed.

Phone Operation

When placing or receiving a phone call, hold your phone as you would a wireline phone.

Body-Worn Operation: Voice Communication

To maintain compliance with RF energy exposure guidelines, if you wear a phone on your body when transmitting voice communications, always place the phone in a Motorola-supplied or approved clip, holder, holster, case, or body harness for this phone, if available. Use of accessories not approved by Motorola may exceed RF energy exposure guidelines.

If you do not use one of the body-worn accessories approved or supplied by Motorola, and are not using the phone held in the normal use position, ensure the phone and its antenna are at least 2.5 centimeters (1 inch) from your body when transmitting.

Data Operation

When using any data feature of the phone, with or without an accessory cable, position the phone and its antenna at least 2.5 centimeters (1 inch) from your body.

Approved Accessories

Use of accessories not approved by Motorola, including but not limited to batteries, antennas, and convertible covers, may cause your phone to exceed RF energy exposure guidelines. For a list of approved Motorola accessories, visit our website at `www.motorola.com`.

RF Energy Interference/Compatibility

Note: Nearly every electronic device is susceptible to RF energy interference from external sources if inadequately shielded, designed, or otherwise configured for RF energy compatibility. In some circumstances your phone may cause interference.

Note: This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Facilities

Turn off your phone in any facility where posted notices instruct you to do so. These facilities may include hospitals or health care facilities that may be using equipment that is sensitive to external RF energy.

Aircraft

Turn off your wireless device whenever instructed to do so by airline staff. If your device offers a flight mode or similar feature, consult airline staff about use in flight. If your device offers a feature that automatically turns on the phone, then turn off this feature before boarding an airplane or entering an area where the use of wireless devices is restricted.

Medical Devices

Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 15 centimeters (6 inches) be maintained between a handheld wireless phone and a pacemaker.

Persons with pacemakers should:

- ALWAYS keep the phone more than 15 centimeters (6 inches) from your pacemaker when the phone is turned ON.

- NOT carry the phone in the breast pocket.

- Use the ear opposite the pacemaker to minimize the potential for interference.

- Turn OFF the phone immediately if you have any reason to suspect that interference is taking place.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your hearing aid manufacturer to discuss alternatives.

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from RF energy. Your physician may be able to assist you in obtaining this information.

Use While Driving

Check the laws and regulations on the use of phones in the area where you drive. Always obey them.

When using your phone while driving, please:

- Give full attention to driving and to the road. Using a phone may be distracting in certain circumstances. Discontinue a call if you can't concentrate on driving.

- Use handsfree operation, if available.

- Pull off the road and park before making or answering a call if driving conditions so require.

Responsible driving best practices can be found in the "Wireless Phone Safety Tips" at the end of this guide and/or at the Motorola website: www.motorola.com/callsmart.

Operational Warnings

For Vehicles With an Air Bag

Do not place a phone in the area over an air bag or in the air bag deployment area. Air bags inflate with great force. If a phone is placed in the air bag deployment area and the air bag inflates, the phone may be propelled with great force and cause serious injury to occupants of the vehicle.

Gas or Petrol Stations

Obey all posted signs with respect to the use of radio equipment in gas or petrol stations. Turn off your wireless device if instructed by authorized staff.

Potentially Explosive Atmospheres

Turn off your phone prior to entering any area with a potentially explosive atmosphere. Do not remove, install, or charge batteries in such areas. Sparks in a potentially explosive atmosphere can cause an explosion or fire resulting in bodily injury or even death.

Note: The areas with potentially explosive atmospheres referred to above include fueling areas such as below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust, or metal powders. Areas with potentially explosive atmospheres are often but not always posted.

Blasting Caps and Areas

To avoid possible interference with blasting operations, turn OFF your phone when you are near electrical blasting caps, in a blasting area, or in areas posted "Turn off electronic devices." Obey all signs and instructions.

Damaged Products
If your phone or battery has been submerged in water, punctured, or subjected to a severe fall, do not use it until you take it to a Motorola Authorized Service Center to determine if it has been damaged. Do not attempt to dry it with an external heat source, such as a microwave oven.

Batteries and Chargers

Batteries can cause property damage and/or bodily injury such as burns if a conductive material such as jewelry, keys, or beaded chains touch exposed terminals. The conductive material may complete an electrical circuit (short circuit) and become hot. Take care when handling a charged battery, particularly when placing it inside a pocket, purse, or other container with metal objects. **Use only Motorola Original™ batteries and chargers.**

Caution: To avoid risk of personal injury, do not dispose of your battery in a fire.

Your battery, charger, or phone may contain symbols, defined as follows:

Symbol	Definition
⚠	Important safety information will follow.
⊘	Your battery or phone should not be disposed of in a fire.
♻	Your battery or phone may require recycling in accordance with local laws. Contact your local regulatory authorities for more information.
⊠	Your battery or phone should not be thrown in the trash.
⊖ Li Ion BATT ⊕	Your phone contains an internal lithium ion battery.

Choking Hazards

Your phone or its accessories may include detachable parts, which may present a choking hazard to small children. Keep your phone and its accessories away from small children.

Seizures/Blackouts

Some people may be susceptible to epileptic seizures or blackouts when exposed to flashing lights, such as when watching television or playing video games. These seizures or blackouts may occur even if a person never had a previous seizure or blackout.

If you have experienced seizures or blackouts, or if you have a family history of such occurrences, please consult with your doctor before playing video games on your phone or enabling a flashing-lights feature on your phone. (The flashing-light feature is not available on all products.)

Parents should monitor their children's use of video game or other features that incorporate flashing lights on the phones. All persons should discontinue use and consult a doctor if any of the following symptoms

occur: convulsion, eye or muscle twitching, loss of awareness, involuntary movements, or disorientation.

To limit the likelihood of such symptoms, please take the following safety precautions:

- Do not play or use a flashing-lights feature if you are tired or need sleep.

- Take a minimum of a 15-minute break hourly.

- Play in a room in which all lights are on.

- Play at the farthest distance possible from the screen.

Repetitive Motion Injuries

When you repetitively perform actions such as pressing keys or entering finger-written characters, you may experience occasional discomfort in your hands, arms, shoulders, neck, or other parts of your body. Follow these instructions to avoid problems such as tendonitis, carpal tunnel syndrome, or other musculoskeletal disorders:

- Take a minimum 15-minute break every hour of game playing.

- If your hands, wrists, or arms become tired or sore while playing, stop and rest for several hours before playing again.

- If you continue to have sore hands, wrists, or arms during or after play, stop playing and see a doctor.

1. The information provided in this document supersedes the general safety information in user's guides published prior to January 28, 2005.

Caring for the Environment by Recycling

When you see this symbol on a Motorola product, do not dispose the product with household waste.

Recycling Mobile Phones and Accessories

Do not dispose of mobile phones or electrical accessories, such as chargers or headsets, with your household waste. In some countries or regions, collection systems are set up to handle electrical and electronic waste items. Contact your regional authorities for more details. If collection systems aren't available, return unwanted mobile phones or electrical accessories to any Motorola Approved Service Centre in your region.

European Union Directives Conformance Statement

Hereby, Motorola declares that this product is in compliance with

- The essential requirements and other relevant provisions of Directive 1999/5/EC

- All other relevant EU Directives

```
IMEI: 350034/40/394721/9

CE0168

Type: MC2-41H14                    Product
                                   Approval Number
```
The above gives an example of a typical Product Approval Number.

You can view your product's Declaration of Conformity (DoC) to Directive 1999/5/EC (the R&TTE Directive) at www.motorola.com/rtte - to find your DoC, enter the product Approval Number from your product's label in the "Search" bar on the Web site

essentials

about this guide

This guide shows how to locate a menu feature as follows:

Find it: Press $\boxdot$ > Recent Calls > Dialled Calls

This example shows that, from the home screen, you press
$\boxdot$ to open the menu, highlight and select $\textbf{ⓗ}$ Recent Calls, then
highlight and select Dialled Calls.

Press $\cdot \dot{Q} \cdot$ to scroll to and highlight a menu feature. Press $\cdot \spadesuit \cdot$
or the Select key to select the highlighted menu feature.

symbols	
$\left(\begin{smallmatrix}\mathbf{9} \\ \mathbb{A}\end{smallmatrix}\right)$	This means a feature is network/subscription dependent and may not be available in all areas. Contact your service provider for more information.
$\left(\begin{smallmatrix}\mathbf{9} \\ \boxminus\end{smallmatrix}\right)$	This means a feature requires an optional accessory.

SIM card

Your *Subscriber Identity Module* (SIM) card contains personal
information like your phone number and phonebook entries.

Caution: Don't bend or scratch your SIM card. Keep it away
from static electricity, water, and dirt.

Slide the SIM card under the retention tabs and into the card slot as shown:

1.

2.
battery

battery tips

Battery life depends on the network, signal strength, temperature, features, and accessories you use.

• Always use Motorola Original batteries and chargers. The warranty does not cover damage caused by non-Motorola batteries and/or chargers.

• New batteries or batteries stored for a long time may take more time to charge.

• When charging your battery, keep it near room temperature.

• When storing your battery, keep it uncharged in a cool, dark, dry place, such as a refrigerator.

- Never expose batteries to temperatures below -10°C (14°F) or above 45°C (113°F). Always take your phone with you when you leave your vehicle.

- It is normal for batteries to gradually wear down and require longer charging times. If you notice a change in your battery life, it is probably time to purchase a new battery.

Contact your local recycling center for proper battery disposal.

Warning: Never dispose of batteries in a fire because they may explode.

battery installation

Your handset is designed to use only Motorola Original™ accessory batteries and accessories.

1.
2.
3.
battery charging

New batteries are not fully
charged. Open the protective
cover and plug the travel
charger into your phone as
shown. Plug the other end
into an electrical outlet. The
battery charge indicator light shows when the battery is
charging. Your display shows **Charge Complete** when finished.

Tip: Relax, you can't overcharge your battery. It will perform
best after you fully charge and discharge it a few times.

flip

Please Note: Avoid carrying your phone in a case
or other accessory with a magnet closure, and
avoid placing your phone near a device with a
magnet. Magnets can affect the phone's flip
operation. If this happens, it will not cause long-term harm to
your phone. Simply close and open your phone flip to return it
to normal operation.

To **open** your phone flip:

1 Firmly grasp the phone body with the flip facing you, and use your thumb to pull down on the side of the flip.

2 Remove your thumb to let the flip spring open.
Note: You also can open the flip, without damage, by pulling up at the base like a standard flip phone.

turn it on & off

Caution: On power up, the phone may prompt you to enter your SIM card PIN code to unlock the SIM card. If you enter an incorrect PIN code three times in a row, your SIM card is disabled and your display shows SIM Blocked. Contact your service provider.

To turn on your phone, press and hold ⊙ for a few seconds or until the display turns on. If prompted, enter your six-digit SIM card PIN code and/or four-digit unlock code.
To turn off your phone, press and hold 🔘 for two seconds.

make a call

Enter a phone number and press 🔘 to make a call.

To "hang up," close the flip or press 🔘.

Note: Closing the flip doesn't end a call when the handsfree speaker is turned on (see page 50).

answer a call

When your phone rings and/or vibrates, just open the flip or press 🔘 to answer.

To "hang up," close the flip or press 🔘.

Note: Closing the flip doesn't end a call when the handsfree speaker is turned on (see page 50).

your phone number

From the home screen, press 🔳 ⬛ to see your number.

Tip: Want to see your phone number while you're on a call? Press 🔳 > My Tel. Numbers.

To store or edit your name and phone number on your SIM card, press the Edit key while showing your number. If you don't know your phone number, contact your service provider.

main attractions

You can do much more with your phone than make and receive calls!

voice commands

You can use voice commands to make calls, and to open and use some phone applications.

Note: Not all phone languages suppport voice recognition and voice commands.

open applications

To open the **Camera** or **Voicemail** applications, **Redial** (dialled calls list), or **Received Calls** list:

1 Press and release the voice key.

Your phone prompts you to say a command.

2 Say one of the following commands:

"Camera," "Voicemail," "Redial" (dialled calls list), or "Received Calls"

Your phone opens the application.

make a call

You can use voice commands to make a call:

- Use **name dial** to dial a phonebook entry by speaking the entry's name.

- Use **digit dial** to dial any phone number by speaking its digits.

Tip: Speak numbers at a normal speed and volume, pronouncing each digit distinctly. Avoid pausing between digits.

1 Press and release the voice key.

   Your phone prompts you to say a command.

2 Say "Name Dial" or "Digit Dial."

3 When prompted, say the name of the phonebook entry or speak the digits in the phone number.

   If your phone recognizes the name or number, it makes the call.

Notes:

- Your phone may prompt you to repeat a name or number. If the name/number isn't valid, the phone doesn't make the call.

- If the phone does not recognize the name or number, the display shows a list of names/numbers, asks, "Did you say ...," and highlights the first item in the list. Say "Yes" to call the highlighted number, or "No" to go to the next list item.

   To select the name or number manually, scroll to the name/number on the list and press the **Select** key.

   To exit the list, say "Cancel."

   If you reach the end of the list without confirming a number, the phone says, "Sorry, no match found." To

try to place the call again, press the **Repeat** key, say "Call," and clearly speak the name or number.

- You can improve voice dial operations by training the phone to recognize your voice. Press 🔳 > **Settings** > **Personalise** > **Voice Dial Setup** > **Adapt Digits**.

video clips

record video clip

Find it: Press 🔳 > **Multimedia** > **Videos** > **[New Video]**

The display shows the active viewfinder image.

Press ⬥◊⬥ up or
down to zoom in
or out.

multimedia messages

For more message features, see page 71.

send a multimedia message

A *Multimedia Messaging Service* (MMS) message contains pages with text and media objects (including

photos, sounds, or video clips). You can send the multimedia message to other MMS-capable phones, and to email addresses.

Find it: Press $\boxed{\Xi}$ > Messages > New Message > New Multimedia Msg

1 Press keypad keys to enter text on the page (for details about text entry, see page 44).

To insert a **Picture**, **Sound**, **Video**, **Voice Record**, **Quick Note**, or **Contact Info** on the page, press $\boxed{\Xi}$ > Insert. Select the file type and the file.

To insert **another page** in the message, enter text or objects on the current page and press $\boxed{\Xi}$ > Insert > New Page. You can enter more text and objects on the new page.

2 When you finish the message, press $\boxed{\Xi}$ > Message options to set message options:

To enter a **subject** for the message, highlight Subject and press the center key $\cdot\dot{\bullet}\cdot$.

To **attach a file** to the message, highlight Attachments and press the center key $\cdot\dot{\bullet}\cdot$. Select the file type and the file.

To set message **priority**, or request a message **delivery report** or **read report**, highlight the option and press $\cdot\dot{\bullet}\cdot$.

3 When you finish setting message options, press the Done key.

4 Press the Send To key to select one or more message recipients:

To select a **phonebook entry**, highlight the entry and press the center key $\cdot \hat{\bullet} \cdot$. Repeat to add other phonebook entries.

To enter a new **phone number**, highlight [New Number] and press $\cdot \hat{\bullet} \cdot$.

To enter a new **email address**, highlight [New Email Address] and press $\cdot \hat{\bullet} \cdot$.

5 To **send** the message, press the Send key.

To **cancel or save** the message as a Draft, press $\boxed{\Xi} >$ Save to Drafts.

receive a multimedia message

When you receive a multimedia message or letter, your phone plays an alert and the display shows New Message with a message indicator such as $\mathbb{R}$.

Press the Read key to open the message.

- Photos, pictures, and animations show as you read the message.

- A sound file plays when its page shows. Use the volume keys to adjust the sound volume.

  Note: In a multimedia letter, you may have to highlight an indicator in the text to play a sound file.

- Attached files are added to the end of the message. To open an attachment, highlight the file indicator/filename and press the View key (image), Play key (sound), or Open key (phonebook vCard, datebook vCalendar entry, or unknown file type).

Bluetooth® wireless

Your phone supports Bluetooth wireless *pairing* (also called *linking* or *bonding*). You can pair your phone with a Bluetooth headset or car kit, or pair your phone with another device to exchange and synchronize files.

Note: The use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

turn Bluetooth power on or off

Find it: Press $\boxdot$ > Settings > Connectivity > Bluetooth Link > Setup > Power > On

When Bluetooth power is on, your phone can automatically pair with the handsfree device you have used before. Just turn on the device and move it within range of the phone.

Note: To extend battery life, use this procedure to set Bluetooth power to **Off** when not in use. Your phone will not pair with devices until you set Bluetooth power back to **On** and pair your phone with the devices again.

pair with a headset or handsfree device

Before you try to pair your phone with a device, make sure your phone's Bluetooth power is **on** and the device is **on** and **ready** in *pairing* or *bonding* mode (see the user's guide for the device). You can pair your phone with only one device at a time.

Find it: Press $\boxdot$ > Settings > Connectivity > Bluetooth Link > Hands-free > [Look for devices]

Your phone lists the devices it finds within range.

1 Highlight a device in the list and press the Select key.

2 Press the Yes key to pair with the device.

3 If necessary, enter the device passkey (such as 0000) and press the Ok key.

When your phone is paired, the Bluetooth indicator ϟ shows in the home screen and the external Bluetooth indicator light flashes.

Tip: For specific information about a device, see the instructions that came with it.

copy objects to another device

You can use Bluetooth pairing to copy a media object, phonebook entry, datebook event, or bookmark from your phone to a computer or other device.

1 Highlight the object on your phone that you want to copy to the other device.

2 Press ≡ and select Copy (for media objects) Send (for datebook events or bookmarks), or Share Phonebook Entry (for phonebook entries).

3 Select a recognized device name, or [Look For Devices] to search for the device where you want to copy the object.

send objects to a printer

You can use Bluetooth pairing to send a picture, message, phonebook entry, or datebook event from your phone to a printer.

Note: You can print A4 or US Letter size pages. To print another size, copy the object to a linked computer and print it from there. You cannot print Quick Notes, MMS Templates, or a phonebook Mailing List.

1 On your phone, highlight the object that you want to print, then press 🔳 > Print.

 Tip: If you see it, you can print it. After you capture a picture in the camera, you can press the Store key and select Print and Store.

2 If available, choose additional objects or print options.

3 Select a recognized printer name listed in the Print Options or [Print] > [Look for devices] to search for the device to which you want to send the object.

advanced Bluetooth® features

features		
make phone visible to other device	Allow a Bluetooth device to discover your phone: 🔳 > Settings > Connectivity > Bluetooth Link > Setup > Find Me	🎧

charge level. Recharge the battery when your phone
shows Low Battery.

8 Ring Style Indicator – Shows the ring style setting.

△» = loud ring　　　　　△» = soft ring

⟩⟨ = vibrate　　　　　⟩△ = vibrate then ring

△⟨ = silent　　　　　⟩△⟨ = vibrate & ring

menus

From the home screen, press $\boxed{\equiv}$ to open the main menu.

Highlighted Menu Feature Icon

Exit the main menu.

Scroll up, down, left, or right. Press center key •◆• to select menu feature.

Select Highlighted menu feature.

Exit menu without making changes.
* Please refer to your handset for actual display of menu feature icons.

The following menu icons may be available, depending on your service provider and service subscription options.

menu features					
🗂	Phonebook	🕾	Recent Calls	✉	Messages
🎣	Tools	🎮	Games & Apps	🌐	WebAccess
🎞	Multimedia	🔵	Bluetooth Link	🔧	Settings

Some features require you to select an option from a list:

Highlighted Option

Press the **Back** key to go back to previous screen.

Press the **View** key to see details of highlighted option.
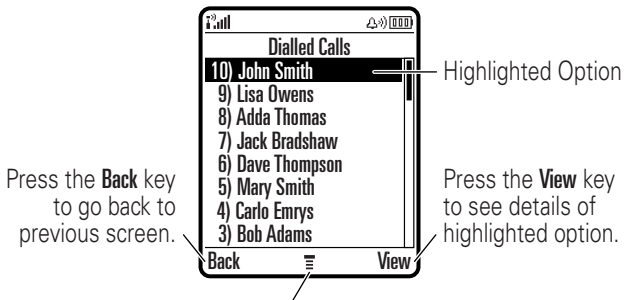

Press 🔳 to open sub-menu.

- Scroll up or down to highlight the option you want.

- In a numbered list, press a number key to highlight an option.

- In an alphabetized list, press a key repeatedly to cycle through its letters and highlight the closest matching list option.

- When an option has a list of possible settings, scroll left or right to select the setting.

- When an option has a list of possible numeric values, press a number key to set the value.

text entry

Some features let you enter text.

For indicator descriptions, see following section.

Character Counter

Flashing cursor indicates insertion point.

Press 国 to open sub-menu.

Cancel

Press the **Cancel** key to exit without making changes.
Press 班 in a text entry screen to select an entry mode:

entry modes	
喞 or ₁	Your **Primary** text entry mode can be set to any iTAP® 喞 or tap ₁ mode.
喞 or ₂	Your **Secondary** text entry mode can be set to any iTAP 喞 or tap ₂ mode, or set to **None** if you don't want a secondary entry mode.
₁₂₃	**Numeric** mode enters numbers only.
@	**Symbol** mode enters symbols only.

To set your primary and secondary text entry modes, press 国 > **Entry Setup** in a text entry screen and select **Primary Setup** or **Secondary Setup**.

Tip: WANT TO SHOUT YOUR MESSAGE? Press ⓪ in a text entry screen to change text case to no capital letters (ₐᵦ𝒸), next letter capital (ₐᵦᵪ with ₘₜ, ₘₜ, ₁ₜ, or ₂ₜ), or all capitals (ₐᵦᵪ with ₘₜ, ₘₜ, ₁ₜ, or ₂ₜ).

iTAP® mode

Press # in a text entry screen to switch to iTAP mode. If you don't see ₘ or ₘ, press ▤ > **Entry Setup** to set iTAP mode as your primary or secondary text entry mode.

iTAP mode lets you enter words using one keypress per letter. The iTAP software combines your keypresses into common words, and predicts each word as you enter it.

For example, if you press ⑦ ⑦ ⑥ ④, your display shows:

Press ⨯ to enter **Prog** and a space.

Press ·Ȯ· up to accept **Program**.

Press the **Delete** key to delete last letter.

Press ·Ȯ· right to highlight another combination.

Press the **Select** key to select highlighted combination with no space.
- If you want a different word (such as **Progress**), continue pressing keypad keys to enter the remaining characters.

basics   **45**

- To enter numbers quickly, press and hold a number key to temporarily switch to numeric mode. Press the number keys to enter the numbers you want. Enter a space to change back to iTAP mode.

- Press $\boxed{1}$ to enter punctuation or other characters.

tap mode

Press $\boxed{\#}$ in a text entry screen to switch to tap mode. If you don't see ₁ or ₂, press $\boxed{\equiv}$ > **Entry Setup** to set tap mode as your primary or secondary text entry mode.

To enter text in tap mode, press a keypad key repeatedly to cycle through the letters and number on the key. Repeat this step to enter each letter.

For example, if you press $\boxed{7}$ one time, your display shows:

Character displays at insertion point.

Press the **Delete** key to delete character to left of insertion point.

After two seconds, character is accepted & cursor moves to next position.

Press the **Send To** key to enter recipients.
When you enter three or more characters in a row, your phone may guess the rest of the word. For example, if you enter **prog** your display might show:

Press ·Ò· right to accept **program**. Press ✳ to reject it and enter a space after **prog**.

```
┌─────────────────────────┐
│ 📶          ♪))📶          │
│ abc 1 , Msg         443  │
│ Prog|ram                │
│ ─────────────────────── │
│ ─────────────────────── │
│ ─────────────────────── │
│ ─────────────────────── │
│ ─────────────────────── │
│ ─────────────────────── │
│ Delete      ☰   Send To │
└─────────────────────────┘
```
To enter a different word (such as **progress**), press keys to enter remaining characters.

- The first character of every sentence is capitalized. If necessary, press ·Ò· down to change the character to lowercase before the cursor moves to the next position.

- Press ·Ò· to move the flashing cursor to enter or edit message text.

- If you don't want to save your text or text edits, press ⊙ to exit without saving.

- *Tap extended* mode cycles through additional special characters and symbols as you repeatedly press a keypad key.

numeric mode

Press ⌗ in a text entry screen until you see **123**. Press the number keys to enter the numbers you want.

symbol mode

Press **#** in a text entry screen until you see @. Press a keypad key to show its symbols at the bottom of the display. Highlight the symbol you want, then press the **Select** key.

volume

Press the volume keys to:

- turn off an incoming call alert

- change the earpiece volume during a call

- change the ringer volume from the home screen
Tip: Sometimes silence really is golden. That's why you can quickly set your ringer to **Vibrate** or **Silent** by pressing the down volume key repeatedly in the home screen.

navigation key

Press the *navigation key* ·Ô· up, down, left, or right to scroll and highlight menu items. When you highlight something, press the *center key* ·◆· to select it. The center key usually does the same thing as the right soft key.
smart key

The smart key gives you another way to do things. For example, when you highlight a menu item, you can press the smart key to select it (instead of pressing the Select key). The smart key usually does the same thing as the right soft key. To change what the smart key does in the home screen, see page 74.
external display

When your phone is closed, the external display shows the time and indicates phone status, incoming calls, and other events. For a list of phone status indicators, see page 39.

Tip: To change external display orientation, press 🔲 > Settings > Initial Setup > External Display > Left Orientation or Right Orientation.

set phone ring style in external display

1 Press a volume key to see Ring Styles.

2 Press the smart key repeatedly, until the style you want appears.

3 Press a volume key to return to the home screen.

return unanswered call in external display

Your phone keeps a record of your unanswered calls, and the external display shows X Missed Calls, where X is the number of missed calls.

Tip: Since the microphone and earpiece are hidden when the phone is closed, you'll have to use a headset or other handsfree device to make and receive calls.

Note: The use of wireless devices and their accessories may be prohibited or restricted in certain areas. Always obey the laws and regulations on the use of these products.

1 Press the smart key to see the received calls list.

2 Press the volume keys to highlight an unanswered call.

- To call the number with a headset connected to your phone, press and hold the smart key.

- To exit without calling, press the smart key briefly.

handsfree speaker

You can use your phone's handsfree speaker to make calls without holding the phone to your ear.

During a call, press the **Speaker** key to turn the handsfree speaker on or off. Your display shows **Spkrphone On** until you turn it off or end the call.

Notes:

- Closing the flip doesn't end a call when the handsfree speaker is turned on.

- The handsfree speaker won't work when your phone is connected to a handsfree car kit or headset.

codes & passwords

Your phone's four-digit **unlock code** is originally set to **1234**. The six-digit **security code** is originally set to **000000**. If your service provider didn't change these codes, you should change them:

Find it: Press <kbd>☰</kbd> > Settings > Security > New Passwords

You can also change your **SIM PIN** codes.

If you forget your unlock code: At the Enter Unlock Code prompt, try entering 1234 or the last four digits of your phone number. If that doesn't work, press <kbd>☰</kbd> and enter your six-digit security code instead.

If you forget other codes: If you forget your security code, SIM PIN code, or PIN2 code, contact your service provider.

lock & unlock phone

You can lock your phone to keep others from using it. To lock or unlock your phone, you need the four-digit unlock code.

To **manually lock** your phone: Press <kbd>☰</kbd> > Settings > Security > Phone Lock > Lock Now.

To **automatically lock** your phone whenever you turn it off: Press <kbd>☰</kbd> > Settings > Security > Phone Lock > Automatic Lock > On.

Note: You can make emergency calls on a locked phone (see page 59). A locked phone still rings or vibrates for incoming calls or messages, **but you need to unlock it to answer**.

customize

ring style

Each ring style profile uses a different set of sounds or vibrations for incoming calls and other events. The **Silent** profile silences your phone until you set another ring style. Here are the profiles you can choose:

⚏⟩ **Loud**	⚏⟫ **Soft**	⚏⟩⚏ **Vibrate**
⟩⚏ **Vibe then Ring**	⚏⟩ **Silent**	⟩⚏⟩ **Vibe & ring**

The ring style profile's indicator shows at the top of your home screen. To choose your profile:

Find it: Press ▤ > **Settings** > **Ring Styles** > **Style** > *style name*

change alerts in a ring style

You can change the alerts for incoming calls and other events. Your changes are saved in the current ring style profile.

Find it: Press ▤ > **Settings** > **Ring Styles** > *style* **Detail**

Note: *Style* represents the current ring style. You can't set an alert for the **Silent** ring style profile.

1 Highlight **Calls** (or **Line 1** or **Line 2** for dual line phones), then press the **Change** key to change it.

2 Highlight the alert you want, then press the **Select** key.

3 Press the **Back** key to save the alert setting.

time & date

You need to set your phone's time and date to use the datebook.

Find it: Press 〔≡〕 > Settings > Initial Setup > Time and Date

To **synchronize** the time and date with the network: Press 〔≡〕 > Settings > Initial Setup > Time and Date > Autoupdate > On *.

To **manually** set the time and date, turn off Autoupdate, then: Press 〔≡〕 > Settings > Initial Setup > Time and Date > Time and Date.

* Network-dependent feature

wallpaper

Set a photo, picture, or animation as a wallpaper (background) image in your home screen.

Find it: Press 〔≡〕 > Settings > Personalise > Wallpaper

options	
Picture	Select a picture for your wallpaper image, or None for no wallpaper.
Layout	Select Center to center the image in the display, Tile to repeat the image across the display, or Fit-to-screen to stretch the image across the display.

screen saver

Set a photo, picture, or animation as a screen saver image. The screen saver shows in the display when the flip is open and no activity is detected for a specified time.

Tip: This feature helps save your screen, but not your battery. To extend battery life, turn off the screen saver.

Find it: Press [≡] > Settings > Personalise > Screen Saver

options	
Picture	Select an image for your screen saver, or None for no screen saver.
Delay	Select the length of inactivity before the screen saver shows in the display.

themes

A *phone theme* is a group of image and sound files that you can apply to your phone. Most themes include a wallpaper image, screen saver image, and ring tone. Your phone may come with some themes, and you can download more.

To **apply** a theme: Press [≡] > Multimedia > Themes > *theme*.

To **download** a theme, see page 82.

To **delete** a theme: Press [≡] > Multimedia > Themes, scroll to the theme, and press [≡] > Delete or Delete All.

Note: You can delete only downloaded themes.

display appearance

To choose a phone **skin** that sets the look and feel of your phone's display: Press [≡] > Settings > Personalise > Skin.

To set your display **brightness**: Press [≡] > Settings > Initial Setup > Brightness.

To save battery life, the **backlight** can turn off when you're not using your phone. The backlight turns back on when you open the flip or press any key. To set how long your phone waits before the backlight turns off:

Press M > Settings > Initial Setup > Backlight.

Note: To turn the backlight on or off for Java™ applications, press M > Settings > Java Settings > App Backlight.

To save battery life, the **display** can turn off when you're not using your phone. The display turns back on when you open the flip or press any key. To set how long your phone waits before the display turns off:

Press M > Settings > Initial Setup > Display Timeout.

answer options

You can use additional, alternative methods to answer an incoming call. To activate or deactivate an answer option:

Find it: Press M > Settings > In-Call Setup > Answer Options

options	
Multi-Key	Answer by pressing any key.
Open To Answer	Answer by opening the flip.

calls

To make and answer calls, see page 24.

turn off a call alert

You can press the volume keys to turn off a call alert before answering the call.

recent calls

Your phone keeps lists of incoming and outgoing calls, even for calls that didn't connect. The most recent calls are listed first. The oldest calls are deleted as new calls are added.

Shortcut: Press [⌢] from the home screen to see the dialled calls list.

Find it: Press [≡] > Recent Calls

1 Highlight Received Calls or Dialled Calls, then press the Select key.

2 Highlight a call. A ✓ next to a call means the call connected.

- To call the number, press [⌢].

- To see call details (like time and date), press the View key.

- To see the Last Calls Menu, press [≡]. This menu can include:

options	
Store	Create a phonebook entry with the number in the **No.** field.
Delete/Delete All	Delete one or all entries in the list.
Hide ID/Show ID	Hide or show your caller ID for the next call.
Send Message	Open a new text message with the number in the **To** field.
Add Digits	Add digits after the number.
Attach Number	Attach a number from the phonebook or recent calls lists.
Talk then Fax	Talk and then send a fax in the same call (see page 78).

redial

1 Press from the home screen to see the dialled calls list.

2 Highlight the entry you want to call, then press .

If you hear a **busy signal** and you see Call Failed, Number Busy, press or the Retry key to redial the number. When the call goes through, your phone rings or vibrates one time, shows Redial Successful, and connects the call.

return a call

Your phone keeps a record of your unanswered calls, and shows X Missed Calls, where X is the number of missed calls.

1 Press the View key to see the received calls list.

2 Highlight the call you want to return, then press $\boxed{\text{c}}$.

notepad

The last set of digits entered on the keypad are stored in *notepad* memory. This can be the last phone number you called, or a number that you "jot down" during a call for later use. To see the number stored in the notepad:

Find it: Press $\boxed{\text{≡}}$ > Recent Calls > Notepad

- To call the number, press $\boxed{\text{c}}$.

- To create a phonebook entry with the number in the **No.** field, press the **Store** key.

- To open the **Dialling Menu** to attach a number or insert a special character, press $\boxed{\text{≡}}$.

hold or mute a call

To put all active calls on hold, press $\boxed{\text{≡}}$ > **Hold**.

To put all active calls on mute, press mute on left soft key.

call waiting

When you're on a call, you'll hear an alert if you receive a second call.

Press $\boxed{\text{c}}$ to answer the new call.

- To switch between calls, press the **Switch** key.

58 calls

- To connect the two calls, press the **Link** key.

- To end the call on hold, press $\boxed{\equiv}$ > **End Call On Hold**.

To turn the call waiting feature on or off:

Find it: Press $\boxed{\equiv}$ > **Settings** > **In-Call Setup** > **Call Waiting**

caller ID

Calling line identification (caller ID) shows the phone number for an incoming call in your external and internal displays.

Your phone shows the caller's name and picture when they're stored in your phonebook, or **Incoming Call** when caller ID information isn't available.

You can set your phone to play a different ringer ID for an entry stored in your phonebook (see page 67) *.

* This feature does not applied to entries stored in SIM card.

To show or hide **your phone number** for the next outgoing call, enter digits in the display, then:

Find it: Press $\boxed{\equiv}$ > **Hide ID/Show ID**

emergency calls

Your service provider programs one or more emergency phone numbers, such as 999 or 112, that you can call under any circumstances, even when your phone is locked or the SIM card is not inserted.

Note: Emergency numbers vary by country. Your phone's preprogrammed emergency number(s) may not work in all locations, and sometimes an emergency call cannot be placed due to network, environmental, or interference issues.

1 Press the keypad keys to dial the emergency number.

2 Press `[C]` to call the emergency number.

international calls

If your phone service includes international dialing, press and hold `[0]` to insert your local international access code (indicated by +). Then, press the keypad keys to dial the country code and phone number.

1-touch dial

To call phonebook entries 1 through 9, press and hold the single-digit speed dial number for one second.

You can set 1-touch dial to call the entries in your phone's memory phonebook, your SIM card's phonebook, or your fixed dial list:

Find it: Press `[≡]` > Settings > Initial Setup > 1-Touch Dial > Phone, SIM, or Fixed Dial

To add a new phonebook entry, see page 64. To edit the speed dial number for a phonebook entry, press `[≡]` > Phonebook, highlight the entry, then press `[≡]` > Edit.

voicemail

Your network stores the voicemail messages you receive. To listen to your messages, call your voicemail number.

Note: Your service provider may include additional information about using this feature.

When you **receive** a voicemail message, your phone shows the voicemail message indicator ☺ and **New Voicemail**. Press the **Call** key to listen to the message.

To **check** voicemail messages:

Find it: Press ✉ > **Voicemail**

Your phone may prompt you to store your voicemail phone number. If you don't know your voicemail number, contact your service provider

Note: You can't store a **p** (pause), **w** (wait), or **n** (number) character in this number. If you want to store a voicemail number with these characters, create a phonebook entry for it. Then, you can use the entry to call your voicemail.

other features

Specific Absorption Rate Data

This model meets international guidelines for exposure to radio waves.

Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

The guidelines use a unit of measurement known as the Specific Absorption Rate, or SAR. The ICNIRP SAR limit for mobiles devices used by the general public is 2 W/kg and the highest SAR value for this device when tested at the ear was 0.80 W/kg.[1] As mobile devices offer a range of functions, they can be used in other positions, such as on the body as described in this user guide.[2] In this case, the highest tested SAR value is 0.51 W/kg.[1]

As SAR is measured utilizing the device's highest transmitting power, the actual SAR of this device while operating is typically below that indicated above. This is due to automatic changes to the power level of the device to ensure it only uses the minimum level required to reach the network.

While there may be differences between the SAR levels of various phones and at various positions, they all meet the governmental requirements for safe exposure. Please note that improvements to this product model could cause differences in the SAR value for later products; in all cases, products are designed to be within the guidelines.

The World Health Organization has stated that present scientific information does not indicate the need for any special precautions for the use of mobile devices. They note that if you want to reduce your exposure

then you can do so by limiting the length of calls or using a "hands-free" device to keep the mobile phone away from the head and body.

Additional Information can be found on the websites of the World Health Organization (http://www.who.int/emf) or Motorola, Inc. (http://www.motorola.com/rfhealth).

1. The tests are carried out in accordance with international guidelines for testing. The limit incorporates a substantial margin for safety to give additional protection for the public and to account for any variations in measurements. Additional related information includes the Motorola testing protocol, assessment procedure, and measurement uncertainty range for this product.

2. Please see the *Safety and General Information* section about body worn operation.
